Scientists and Engineers Statistical Data System

2006 National Survey of Recent College Graduates Public Use File

SESTAT is a comprehensive and integrated system of information about the employment, educational and demographic characteristics of scientists and engineers in the United States.

This documentation provides summary information about the variables contained in an extract of the SESTAT data -- specifically an extract containing data from the **2006 National Survey of Recent College Graduates**.

The documentation starts with a list of variables sorted by SESTAT name. Browse through the list and left-click on a variable name to obtain summary information about the variable. Use the Acrobat Page Navigation toolbar to return to the variable list.

The list includes some variables (denoted by an asterisk *) that are available only on the restricted version of the file and are documented here for informational purposes only.

You may print out individual pages or the complete set of summary documentation (about 250 pages). Additional information on these variables is contained on the SESTAT World Wide Web site (<http://www.nsf.gov/statistics/sestat/variableinfo.cfm>).
